About the College

Govt. Degree College Bemina Srinagar established in 1972, is a premier Higher Education Institute of repute, trust and exemplary standards. Located in Srinagar, it provides a unique environment and soothing academic atmosphere among the lush green campus spread over an area of 372 kanals of land. Since its inception, the college has emerged as a leading institute for continuous journey towards academic excellence, blending traditional values with 21st century modernity while transforming its academics, research and extra-curricular activities.

About the Conference

Science education is declining in schools and colleges of our state, as well as in the county. Very few students are opting for science subjects at the time of entry into the Plus Two Level and the Degree Colleges of the country. The number of students in science is declining progressively and at the same time the number of students in Arts, Commerce, Management and IT sectors is increasing. Pure Science is losing its charm, and is dying. There are various vacant positions in science streams in Colleges, Universities and in Research Institutions of the country. The reason is that people with good academic records in science are not available. We as academicians and educationists are concerned over this scenario, as the overall future technological innovations as well as the intellectual development of a nation, in terms of understanding the fundamental laws of nature governing the spheres of physical, biological and mathematical aspects of the life including the origin of universal origin of life, ultimate structure of matter etc, depend upon science education. This is necessary for making the life standard of humanity as well as the future generations better, secure and free from hunger, poverty, diseases and disasters. Also Science

Education is important to inculcate a scientific temper among the students. The conference will cover the following themes/topics

- i) Importance of curriculum in Science
- ii) Reasons of declining trend
- iii) Physical and Bio-sciences-Present Scenario
- iv) Consequences of decline
- v) Corrective measures to be taken

Objectives

- To provide an opportunity to academicians, scientists and educationists to deliberate upon the subject of science education.
- To create the awareness among students about science education and about their future careers in science.
- To bridge the gap between scientific research and science education and also between academic institutions and the outside society.
